LECTURE

HOW MEDIA QUERIES WORK

HOW MEDIA QUERIES WORK (WITH MAX-WIDTH)

Maximum width at which media query still applies

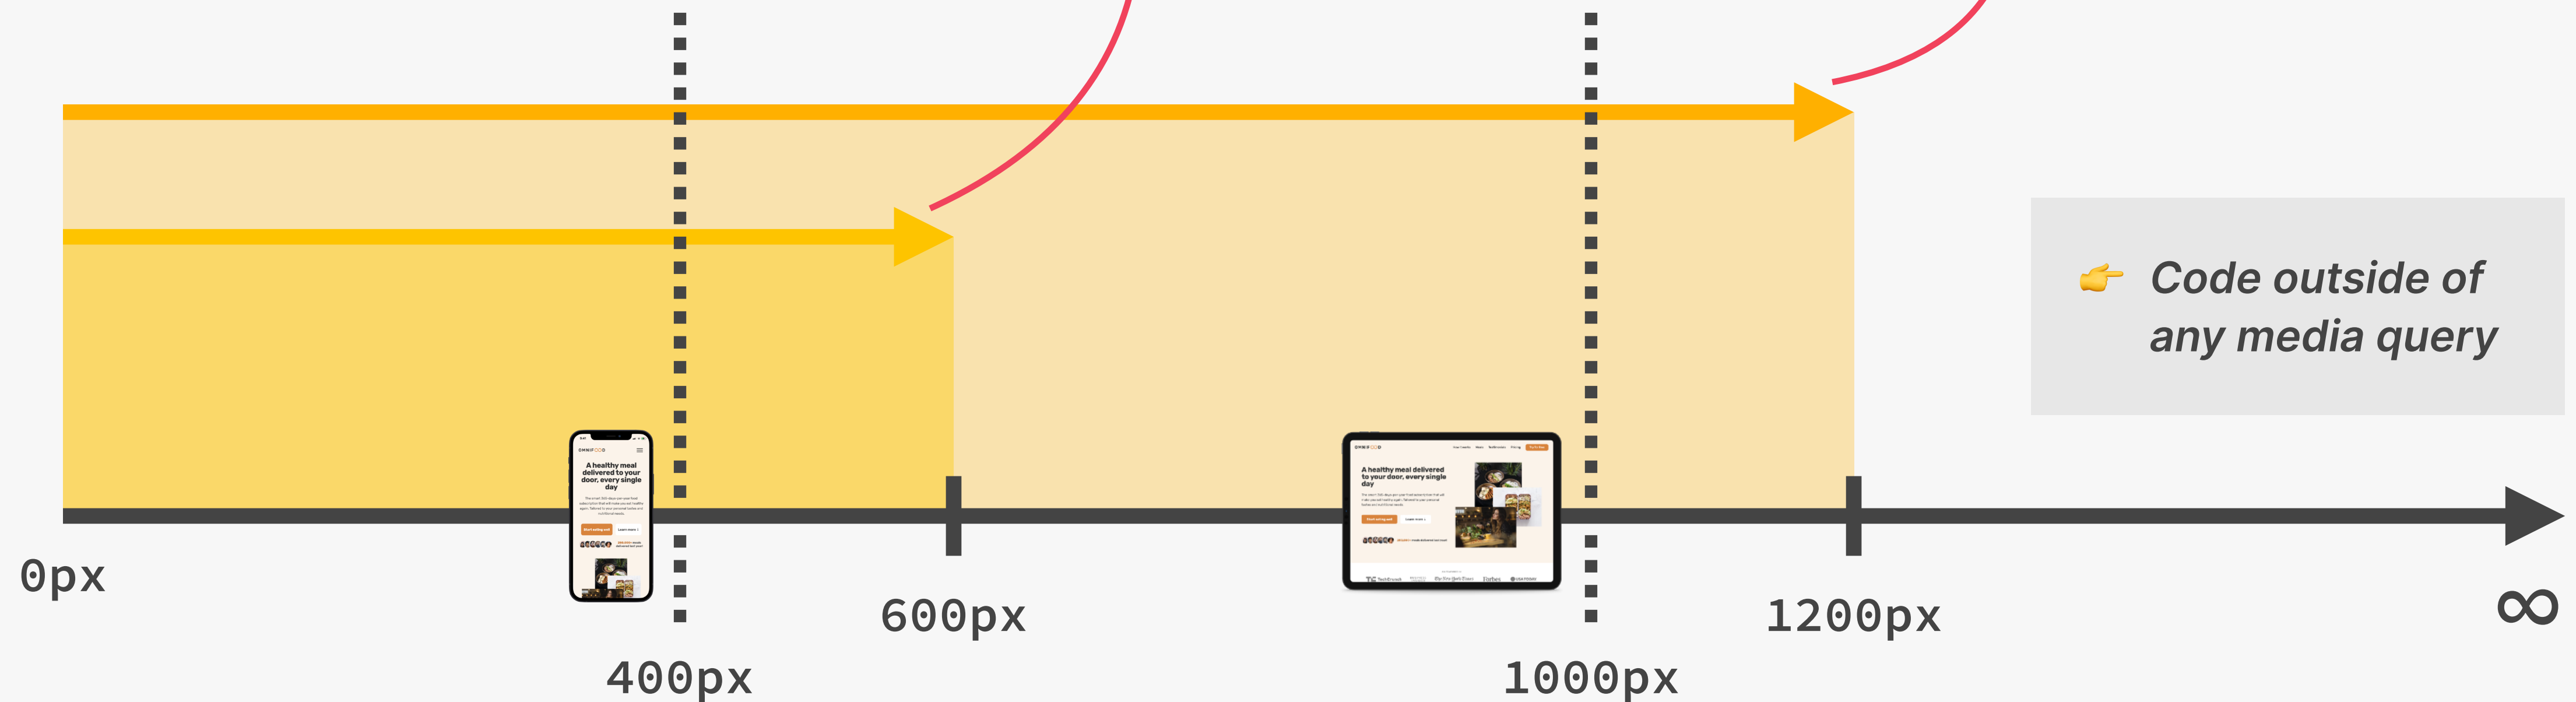

```
@media (max-width: 600px)
```

👉 "Is width \leq 600px?"

```
@media (max-width: 1200px)
```

👉 "Is width \leq 1200px?"

👉 *Code outside of
any media query*

Example: At a viewport width of 400px, CSS in both media queries applies

Example: At a viewport width of 1000px, CSS from the 1200px media queries applies
