

Cascading Style Sheets

CSS

- describes the visual style and presentation of the content written in HTML
- consists of properties that web pages use to format content (e.g. font, text, spacing, layout and many more)

Basic Syntax

```
h1 {  
  
  color: blue;  
  text-align: center;  
  font-size: 20px;  
  
}
```

Styling

- 1. Inline**
- 2. Internal**
- 3. External**

Styling Texts (properties)

color:

font-size:

font-weight:

font-family:

text-transform:

font-style:

text-align:

line-height:
