

CSS Box Sizing

Box Sizing (content-box)

Final element width:

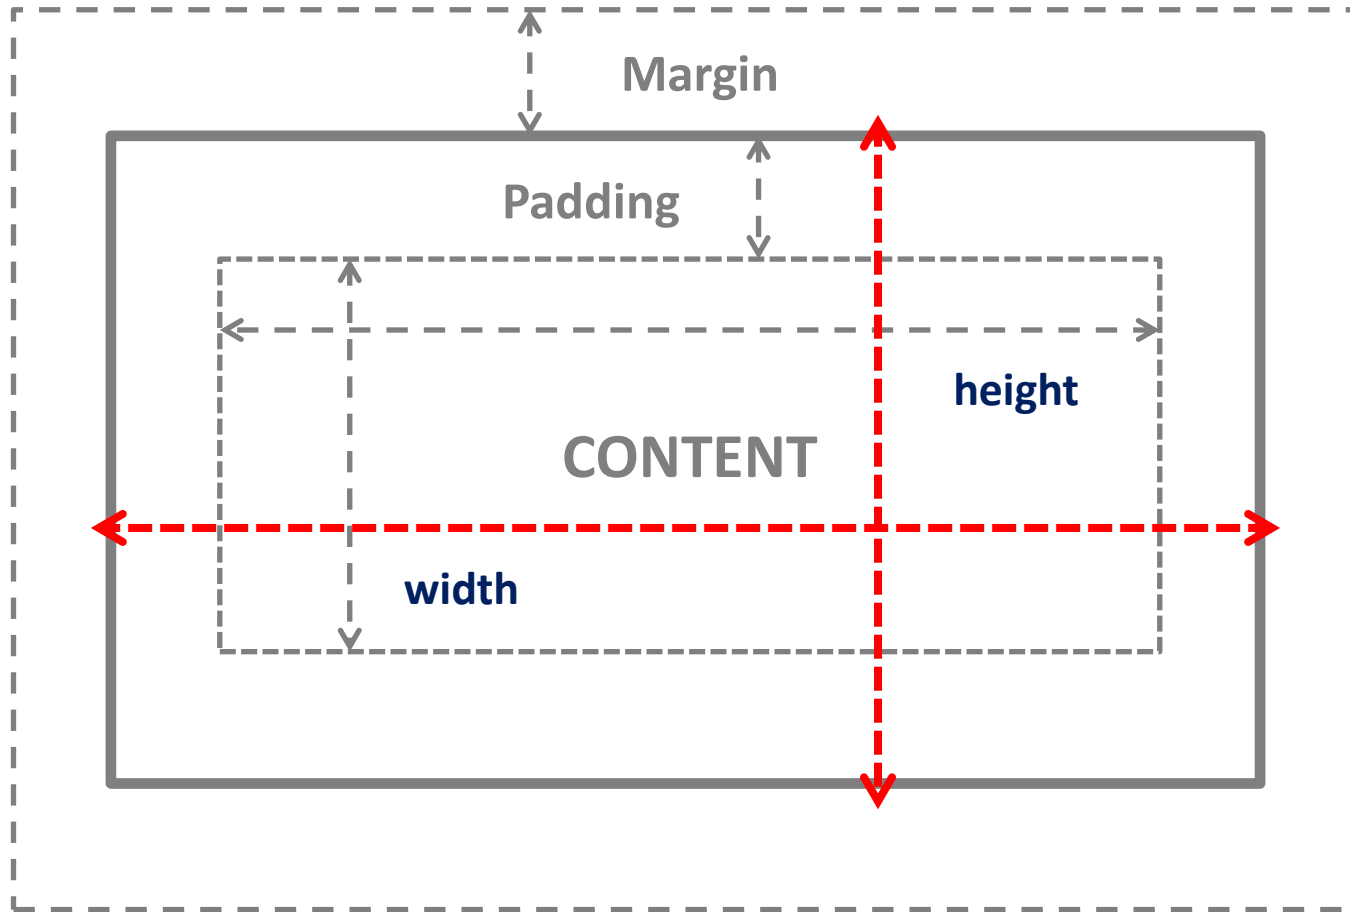

left border + left padding +
content width +
right padding + right border

Final element height:

top border + top padding +
content height +
bottom padding + bottom border

Note: Margins are not part of the
element's dimension

Box Sizing (border-box)

Final element width:

~~left border~~ + ~~left padding~~ +
width +
~~right padding~~ + ~~right border~~

Final element height:

~~top border~~ + ~~top padding~~ +
height +
~~bottom padding~~ + ~~bottom border~~

Note: Margins are not part of the element's dimension

Box Sizing (border-box)

- In the border-box model, the width and height you set **include the content, padding, and border.**
- this **makes it easier** to set an element's size, especially for responsive designs.
