WEB DESIGN RULES #9: USER
EXPERIENCE (UX)

WHAT IS USER EXPERIENCE (UX)?

“ *Design is not just what it looks like and feels like. Design is how it works*”

– Steve Jobs

User Interface (UI) is the visual presentation of a product. It's how the graphical interface looks and feels like

- 👉 Layout
- 👉 “Personality”
- 👉 Typography, colors, icons, etc.

User Experience (UX) is the overall experience the user has while interacting with the product

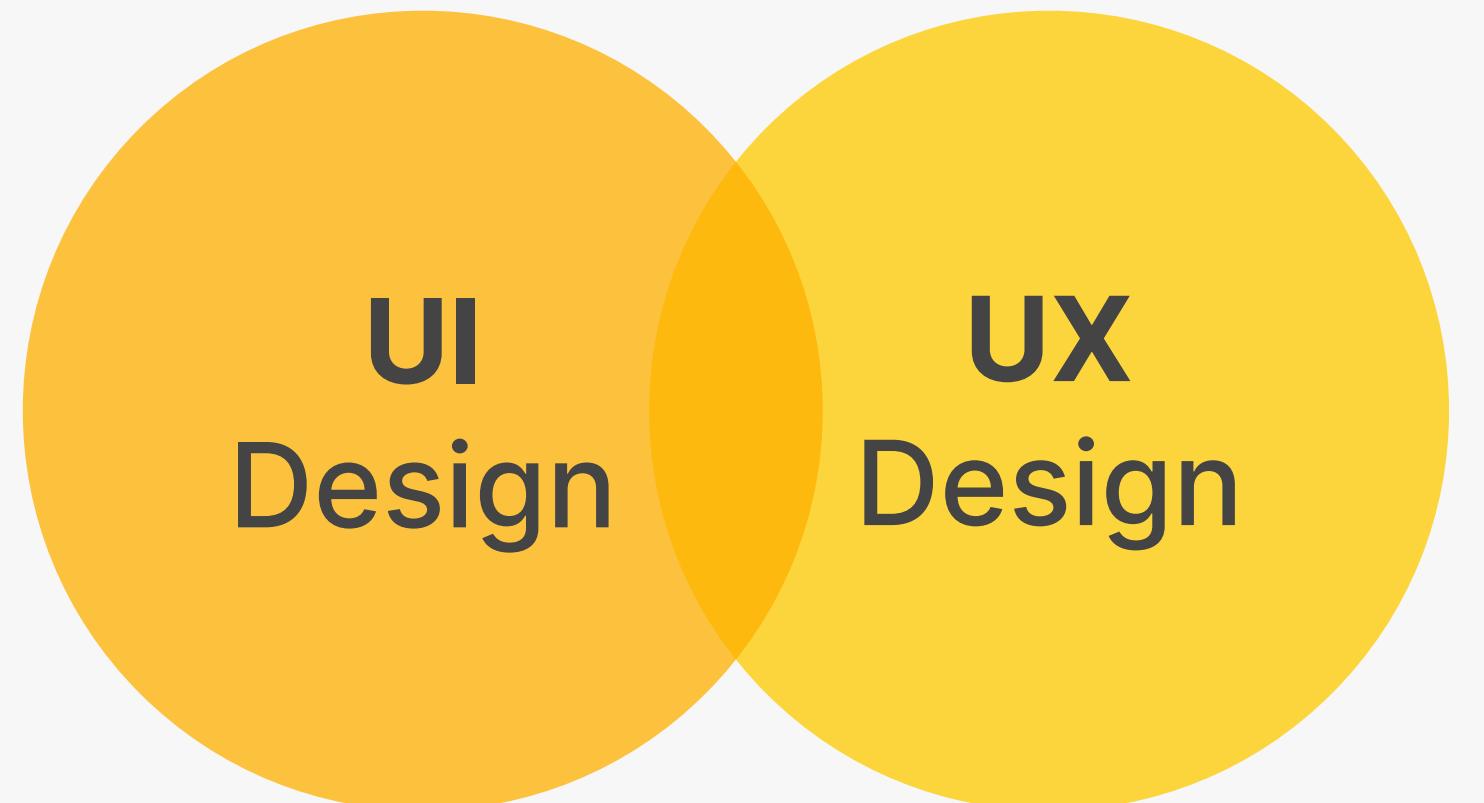

- 👉 Does the app feel **logical** and well thought out?
- 👉 Does the navigation work **intuitively**?
- 👉 Are users **reaching their goals**?

UI AND UX DESIGN

UI is graphical interface 🤝 UI Design is what makes an interface **beautiful**

UX is experience with interface 🤝 UX Design is what makes an interface **useful and functional**

👉 UX Design can not exist without UI Design!

UI →

Both are interfaces to get ketchup

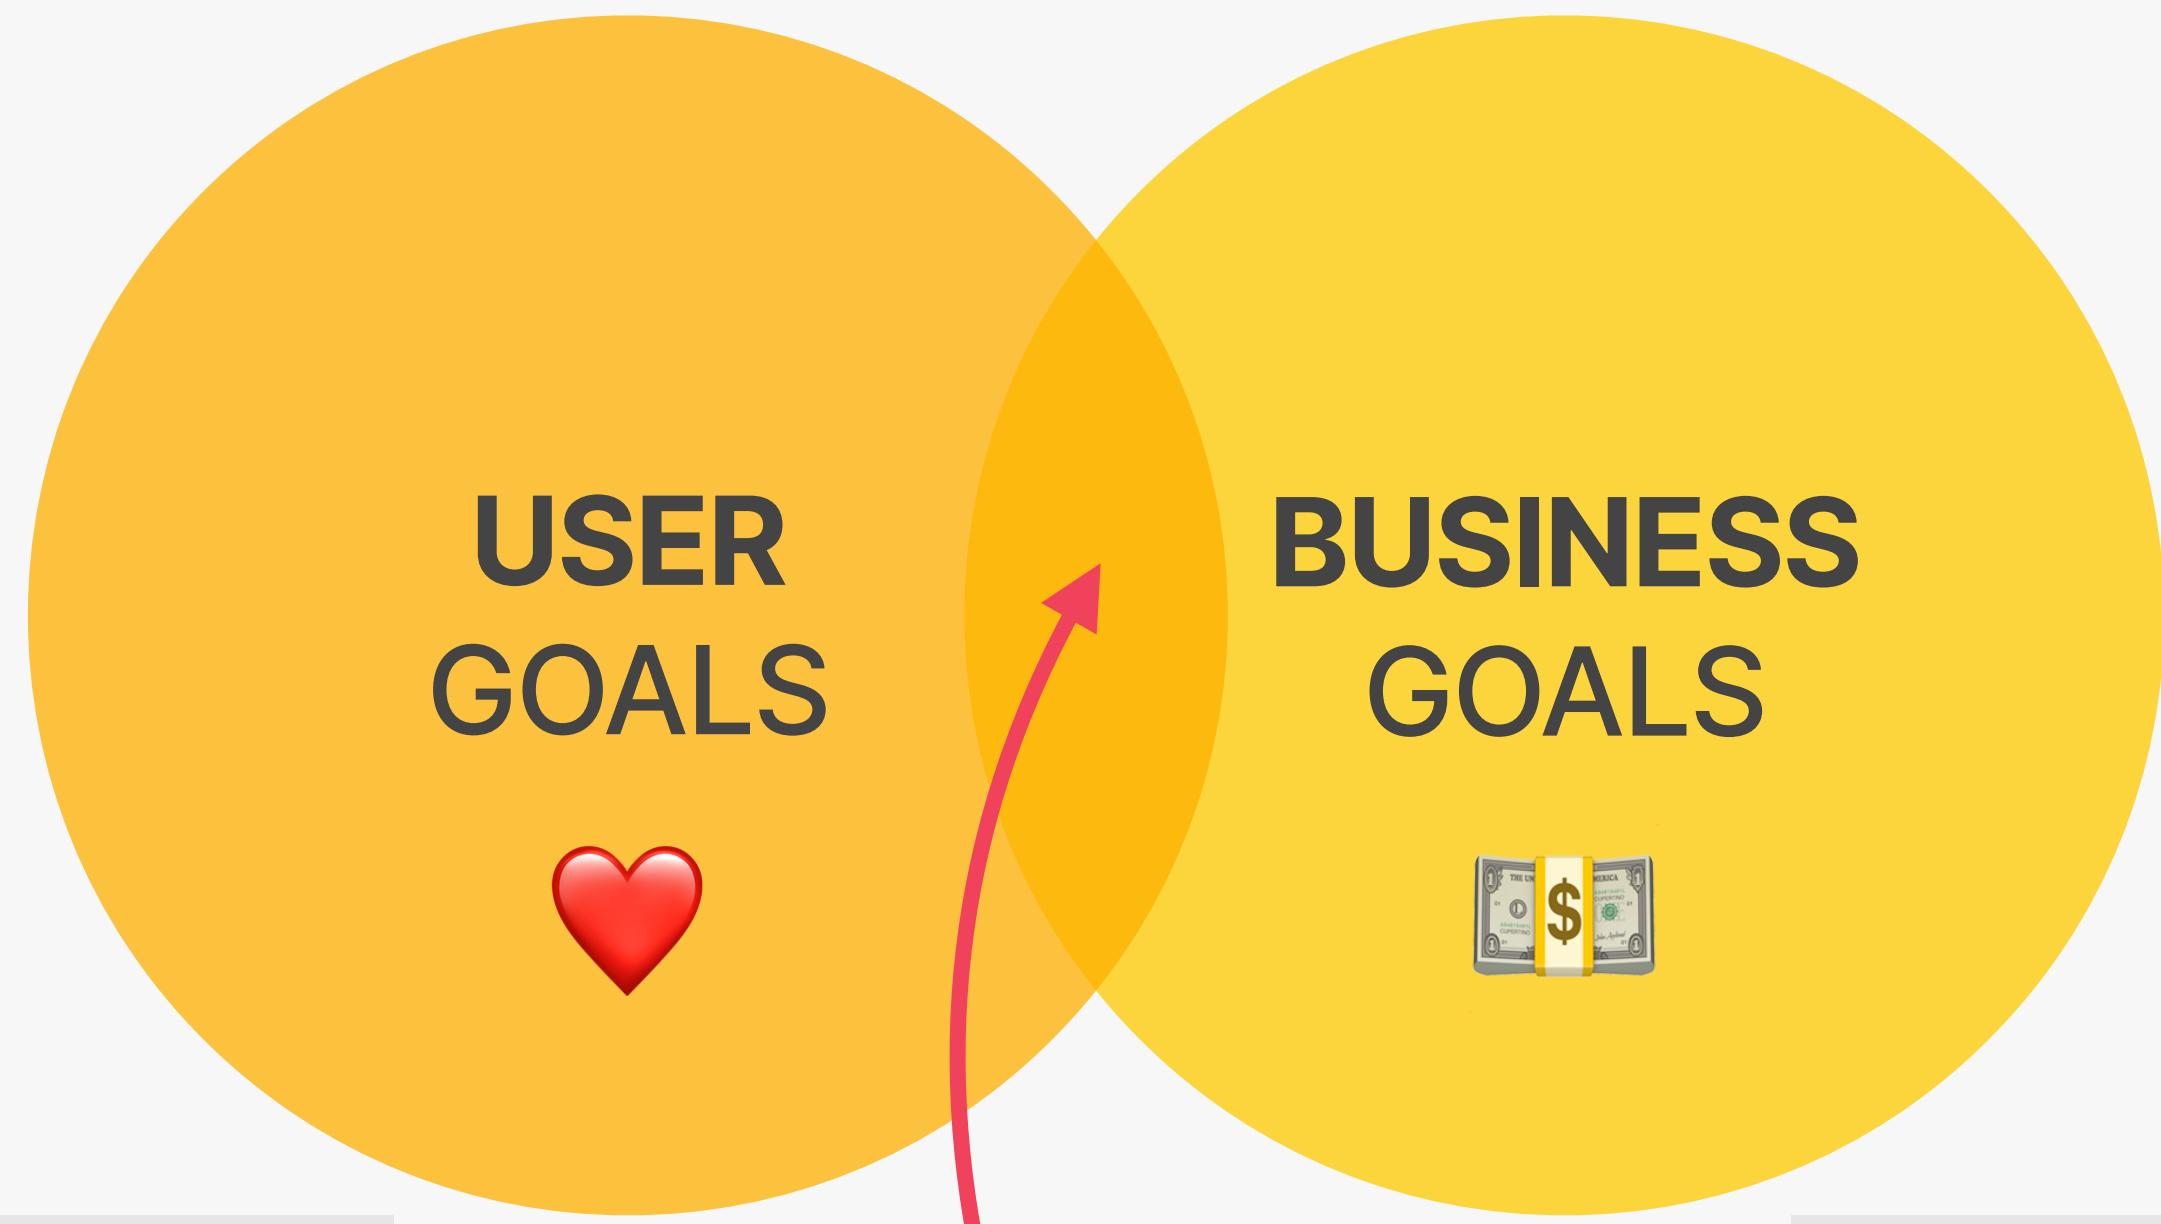

UX →

Each creates a different experience

UX DESIGN GUIDING PRINCIPLE: GOALS

👉 A website or application **exists for a reason**: a **user** has a goal for visiting it, and a **business** has a goal for creating it

EXAMPLE: Designing websites faster

Good UX design **aligns** the **user's goals** with the **business' goals**

EXAMPLE: Selling design kits for design tools

👉 **UX Example:**

for Sketch	for Figma	for Teams
\$48	\$48	from \$78
✓ Personal license ✓ Sketch files ✓ Auto-updatable Style Guide ✓ 200 Components ✓ 120 Wireframe layouts ✓ Free Updates	✓ Personal license ✓ Figma files ✓ Auto-updatable Style Guide ✓ 200 Components ✓ 120 Wireframe layouts ✓ Free Updates	✓ Team license ✓ Sketch & Figma files ✓ Auto-updatable Style Guide ✓ 200 Components ✓ 120 Wireframe layouts ✓ Free Updates
Buy for Sketch	Buy for Figma	Choose Your License

Highlighting an option in the product pricing table:

👉 Helps the **user** decide faster what is the best option ❤️

👉 Helps the **business** maximize revenue 💰

UX RULES FOR USABILITY

Send email

A screenshot of a contact support form. It includes fields for selecting a question, providing additional information, entering an email address, and a large blue 'Send email' button at the bottom. A thick red arrow points from the text 'In forms, align labels and fields in a single vertical line, to make the form easier to scan' down to the 'Send email' button, illustrating the rule of alignment.

★★★★★ "extremely user friendly" ★★★★★ "perfect solution for remote teams" ★★★★★ "truly amazing!"

The All-In-One Toolkit for Working Remotely.

Before Basecamp: You're wondering how you'll quickly transition your team to remote work. People are stressed, work feels scattered, projects are slipping, and it's tough to see + manage everything. **After Basecamp:** Soon you'll be feeling like "hey, we got this". Everything will be organized in one place, your team will be working together (even though they're apart), you'll be on top of things, and a sense of calm will set in.

[Give Basecamp a Try](#)

4,323 companies signed up in the last week alone!

Create a place in Basecamp for each project or team.

Get set up to work remote

Involve everyone who's working on the project.

Use dedicated tools to discuss, plan work, share files, and more.

See what happened when no meetings required.

One place, not all over the place.

Because of COVID-19, your company is likely scrambling to figure out how to transition to remote work. It may feel daunting, but you're in the right place with Basecamp. **We built Basecamp to run our entire remote company** - and we've been working remotely for 20 years. We know what it takes, we do it every day, and we built those learnings into Basecamp. Tens of thousands of other companies rely on Basecamp every day.

[Basecamp is different - take a deeper look at how it works >](#)

We literally wrote the book on working remotely.

We don't just make software for remote work; we wrote a popular and influential book about working remotely too. **REMOTE** shows both employers and employees how they can work together, remotely, from any desk, in any place, anytime, anywhere. Avoid common pitfalls, learn best practices, and get up to speed quick.

[learn more about REMOTE](#)

The image shows the homepage of Avocode, a design tool. At the top, there's a navigation bar with links for PRODUCT, SOLUTIONS, LEARN, PRICING, DOWNLOAD, BLOG, LOG IN, and SIGN UP. The main headline is "Save time working with design files" with a checkmark icon. Below it are four icons: Hand-off, Inspect, Get assets, and Review. A large green cartoon avocado character is on the right. There are also icons for XD, Sketch, Photoshop, and Illustrator. A "START FREE TRIAL" button is visible. Below the main section are logos for Google, Congstar, Frontier Airlines, Panasonic, and American Eagle. The page features several sections demonstrating Avocode's features: "Handoff Designs" showing a link being sent; "Inspect Designs" showing code and assets; and "Copy-paste code & specs and export any asset" showing a comparison between Sketch and Avocode's interface.

UX RULES FOR WEBSITE CONTENT

- 8 Use a **descriptive, keyword-focused headline** on your main page. Don't be vague or fancy!
- 9 Only include **relevant information**, efficiently! **Cut out fluff** and make the content 100% clear
- 10 Use **simple words!** Avoid technical jargon and “smart-sounding” words

**Everything you need

The only VPN you'll ever need

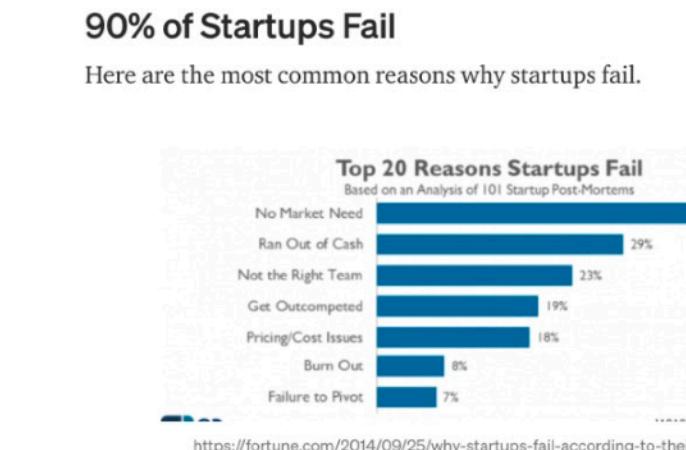

ClearVPN helps you access any content, secure your online interactions and bring your internet life to a whole new level with just one tap.

The modern way to build for the web

Webflow empowers designers to build professional, custom websites in a completely visual canvas with no code.

UX RULES FOR WEBSITE CONTENT

- 8 Use a **descriptive, keyword-focused headline** on your main page. Don't be vague or fancy!
- 9 Only include **relevant information**, efficiently! **Cut out fluff** and make the content 100% clear
- 10 Use **simple words!** Avoid technical jargon and “smart-sounding” words
- 11 Break up long text with **sub-headings, images, block quotes, bullet points, etc.**

I'd like to attract your attention on the top 2 reasons.

| “**No Market Need**” and “**Ran Out of Cash**”.

Those are actually closely related! If a startup is building a product nobody wants they will not get sales and thus will run out of cash.

So to put it bluntly, most of startups fail because they build something nobody wants. Wow!

But still, a lot of startups raise money from investors. Isn't it a sign that they're on the right track? Well, no...

There seems to be an **over-emphasis on money-raising** in the startup industry. But **raising money does not guarantee success**. There are tons of unprofitable startups that raised millions of dollars.

Conclusion

If you have to remember one thing out of this article, it is: **TALK TO USERS!**

- Talk to users **before** building
- Talk to users **while** you're building
- Talk to users **after** you've built
