Texts

One inbox.
All your messages.

[Sign up with Google](#)

Prefer entering email instead?

All in one.

Texts has integrations for all major messaging platforms including iMessage, SMS (with iMessage), WhatsApp, Telegram, Signal, FB Messenger, Twitter, Instagram, LinkedIn and Discord DMs.

Privacy first.

Messages never touch our servers. They're sent directly to the platforms preserving end-to-end encryption. We make money by charging you a monthly subscription.

Archive. Snooze. Mark as unread.

Never miss a message again. Archive chats to hit inbox zero. Keep chats unread by default until you respond to them. Snooze people that you don't want to get to just yet.

Send later.

Schedule messages so they get sent at appropriate times when people are active.

Search all messages.

Find that link, document, picture or video from forever ago easily.

Customizable.

Use the custom CSS feature to customize Texts to the last pixel.

A HEART FOR INGA

INGA-SAURUS COLOURING BOOK

Inga loves dinosaurs, she has a big collection of them, but Inga also has an extremely rare heart defect and needs a life saving operation urgently.

To help raise money for her surgery in the USA - the only place in the world performing such specialist heart surgery - we've created the Ingasaurus colouring book.

We invited artists and illustrators from around the world to donate a dinosaur, creating this dino-tastic collection ready for your favourite colouring pencil!

[Download PDF](#)

Or, simply share Ingasaurus with some of your friends >

A heart for Inga

Bart's mom, Inga, has an extreme form of Ebstein's Anomaly, a rare heart defect. At five years old, she is already halfway through her life without the heart surgery she needs to survive.

This surgery is only available at the Boston's Children's Hospital in the United States, far from Inga's home in Poland. Her family need to raise £250,000 by the end of March 2023 to fund this life-saving treatment and give Inga the best possible chance of a healthy, normal life.

Any donation you can give to help Bart's family reach their fundraising goal would be enormously appreciated.

Your cretaceous colouring

Have you had a roarmming time? Send us a photo of your coloured masterpiece or share your Cretaceous colouring with us on Facebook and Twitter #ingasaurus.

Huge thanks to all of the amazing artists who have made this book possible.

Gabriel Gallego	Tom Redfern	Raquel Mijares	Steve Brown
Dana Rango	Eugen Brundborg	Hannah Foley	Marcuska Mersant
Nais Coates	Alfonso Guerra	Philine Klingel	Brian Wightman
David Riquelme	Andy Oakley	Kimberly Carpenter	

If you're an illustrator, creative or artist and would like to donate your dinosaur, please get in touch: dinosaur@primate.co.uk

Loading script asynchronously as a Promise in JavaScript

February 3, 2021 • 1 min read

In most projects, an external library must be used (e.g. YouTube Player, Google Maps...), so the idea is to create a function to load the script asynchronously using Promise that will be resolved when the script is loaded. We can then trigger actions in the Promise and ensure that everything is executed correctly when loaded.

```
const loadScript = (src, async = true, type = "text/javascript") => {
  return new Promise((resolve, reject) => {
    try {
      const tag = document.createElement("script");
      const container = document.head || document.body;

      tag.type = type;
      tag.async = async;
      tag.src = src;

      tag.addEventListener("load", () => {
        resolve({ loaded: true, error: false });
      });

      tag.addEventListener("error", () => {
        reject({
          loaded: false,
          error: true,
          message: `Failed to load script with src ${src}`,
        });
      });

      container.appendChild(tag);
    } catch (error) {
      reject(error);
    }
  });
};
```

Let's try to load a script

```
loadScript("https://www.youtube.com/iframe_api")
  .then((data) => {
    console.log("YouTube script successfully loaded", data);
  })
  .catch((error) => {
    console.error(error);
  });
};
```

That's it!

Before you leave...

Thanks for reading! 😊

Deploy and scale seamlessly

Our optimized configuration process saves your team time when running and scaling distributed applications, AI & machine learning workloads, hosted services, client websites, or CI/CD environments.

Deploy Scale Store Secure Monitor

 Kubernetes in minutes

Spin up a managed Kubernetes cluster in just a few clicks. Simply specify the size and location of your worker nodes.

 Flexible compute types

With Basic, General Purpose, CPU-Optimized or Memory-Optimized Droplets, you can choose the right infrastructure for your workload.

 App Platform

Build, deploy, and scale apps quickly using a simple, fully managed solution. We'll handle the infrastructure, app runtimes, and dependencies, so that you can push code to production in just a few clicks.
